Introducing the Annual Museum Survey

What is it?

A key annual dataset to understand the state of non-national museums in England. This covers independent, local authority and university governed organisations.

The survey helps us understand the impact of the pandemic on...

Opening hours and audiences

Finances

Use of digital

Workforce and volunteering

140

Number of museums in the South East that took part in this research

64%

Accredited museums the the South East that are independent

38%

Accredited museums in the South East that **usually** get less than 10,000 visits a year

Pandemic context 2020/21

March 2020

Country goes into full lockdown

June 2020

Museums can re-open to the public

Sep-Nov 2020

Localised 'tier' restrictions affect some areas

Dec 2020

Country returns to a full lockdown

March 2021

Some restrictions begin to ease again

About the Annual Museum Survey 2021

The purpose of the Annual Museum Survey 2021 is to gather evidence to help demonstrate the social and economic importance of non-national museums (which are participating in the UK Museum Accreditation Scheme) to funders and stakeholders – locally, regionally and nationally. The data, which is focused on core operational reporting around audiences, finances and workforce, is used alongside data sets of other museums, such as National museums, to gain an understanding of the whole sector.

The level of response in each region is measured by the response rate and confidence interval. Across England, 62% of all museums in scope responded to the Annual Museum Survey and 63% of museums in the South East. The confidence interval (sometimes called the margin of error) is the plus-or-minus figure usually reported in market research and opinion polls.

The South East confidence interval of 5.08% means that when interpreting headline results in the region, you can be confident that if every single museum responded the true figure would be 5.08 percentage points more or less than the figure reported here. The smaller the confidence interval, the more confidence in the results. National survey data has a confidence interval of 2.19%. This confidence level will vary depending on sample sizes for individual questions.

Understanding more about the data

Scope: The Annual Museum Survey includes data from independent, local authority and university and museums. The scope of the survey should be considered when interpreting the findings in this report. Where sample sizes allow, this report provides analysis by governance type such as independent or local authority.

Weighting: Weighting is a statistical process which adjusts data by key variables to improve the accuracy of survey estimates. Data from the Annual Museum Survey has been weighted to ensure the findings are representative of the size, governance type and regional location of museums.

Accounting for organisations with more than one museum site: The Annual Museum Survey captures data from both single site museums and organisations with more than one museum site. Data provided by 'multi site' organisations is a mix of site-specific (for example, visit numbers) and organisation-wide (for example, staffing and finance). When looking at data across single sites and organisations with more than one site, a 'per site' proxy calculation is used.

Additional data sources: Where possible, secondary data sources have been connected the Annual Museum Survey dataset to provide additional analysis. These include rural-urban classifications, indices of deprivation, economic impact using the AIM calculator, volunteer value derived from ONS median pay by local authority and existing Accreditation data.

Sample sizes: The number of museums able to provide data for each question is denoted by 'n' (for example, $n=25$). This is useful context when considering the findings, with more confidence the more responses there are.

Considering the pandemic context

Different museums have been in different situations: More so than any other year, context should be considered when understanding significant findings and differences in this report. For example, variations in local Covid-19 restrictions, access to and use of outdoor spaces as an extension to a museum building, extent to which they are reliant on volunteers who may be shielding or using their time in direct response to the pandemic.

Focus shift for the survey: We have retained the core set of Annual Museum Survey questions to reliably compare across years in order to better understand the impact of the pandemic on museums. Additionally, a number of new questions were added specific to understand even more about how museums responded to the pandemic, including the use of digital and access to Covid-19 related funding.

Ensuring as many museums as possible participated: During an extension to the data collection period a shorter survey was shared to reach museums that had not started the full survey. This allowed us to boost the sample across some core questions such as opening hours and re-opening.

Analysis and interpretation of data: More so than any other year, cleaning and verifying survey returns to build a reliable dataset was a challenge. For example, it is much more difficult to identify anomalous data by comparing against previous years because of the impact of the pandemic. A range of checks have been carried out though, including analysis of the spread of data for each question by the typical size of a museum. Additionally, when reporting any ranges within this report we use the 5th and 95th percentile, ignoring the minimum and maximum values.

About the museums

What do accredited museums look like in the South East?

Take me to...

Volunteer-run museums

32%

Museums in rural locations

Opening

- 13% Did not open during 2020/21
- 65% Fall in opening hours compared to 2019/20*
- 28% Site occupancy less than 20% when open
- 78% Museums not open or fewer than 10k visits

Workforce and volunteering

- 75% Fall in number of volunteer hours*
- 48% Reported a drop in new volunteers recruited
- 27% Museums with staff that made redundancies
- 67% Museums with staff using furlough scheme

Audiences

- 84% Visitors lost compared to 2019/20*
- 32% Provided on-site education sessions
- 94% Reduction in on-site education participants*
- 18% Increase in social media followers*

Finance

- 63% Reported an overall fall in income*
- 70% Reduction in admissions income for 2020/21
- 61% Received local authority Covid-19 support grants
- 35% Received Culture Recovery Fund grants

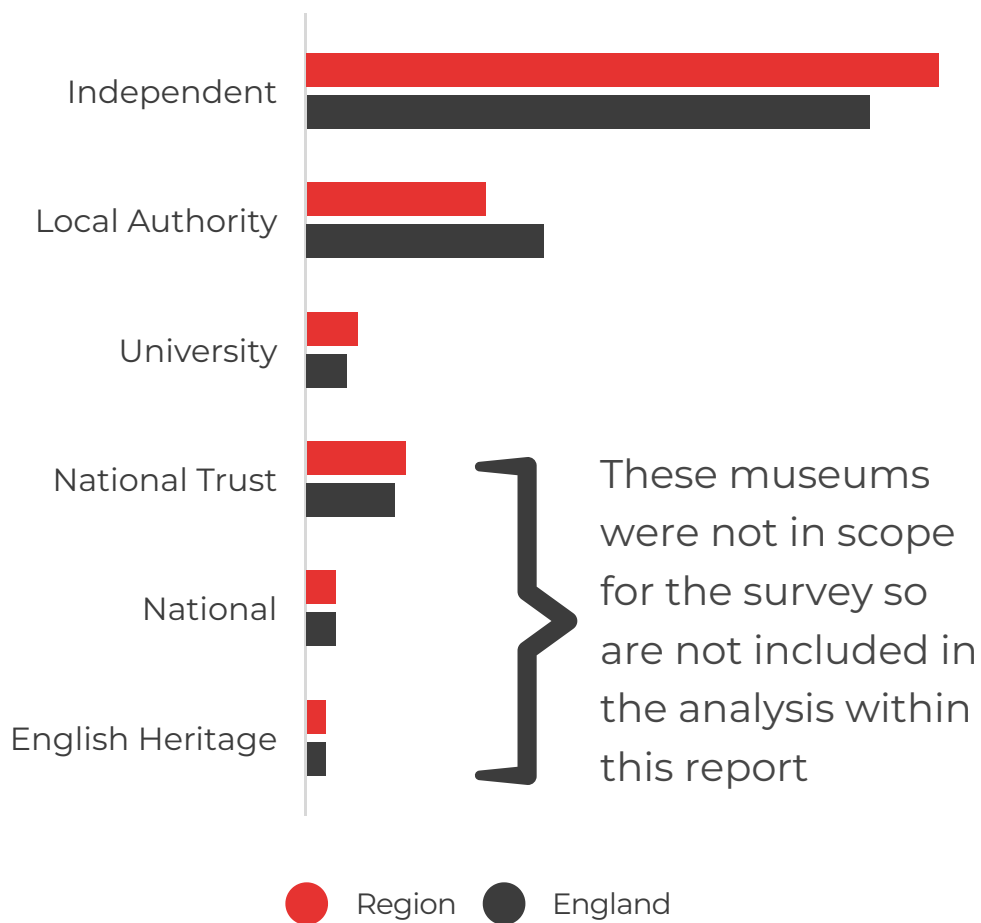

* presenting values based on median number reported, other statements present percentage of museums affected.

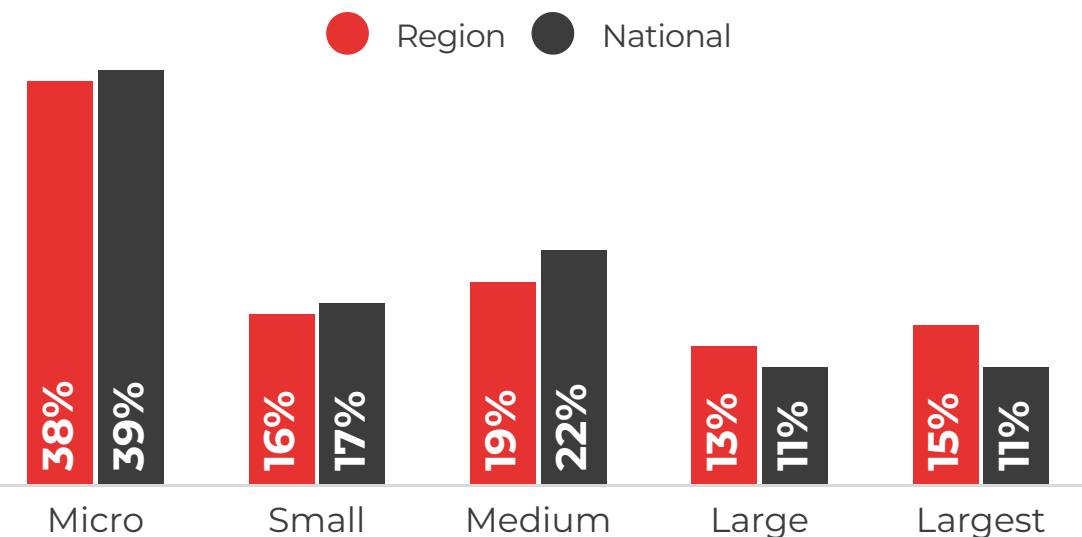

There are 262 museums within the Accreditation scheme in the region

Governance and location data is drawn from Arts Council England's Accredited and Working Towards Accreditation (WTA) museums lists.

There are more/less independent museums in the region compared to nationally

38% of museums in the region are micro

Size categories are used throughout this report and are determined by the total number of visitors each year, these are based on data from a non-pandemic year.

The bands are:

Micro: <10K, Small: 10-20K, Medium: 20-50K
Large: 50-100K, Largest: >100K

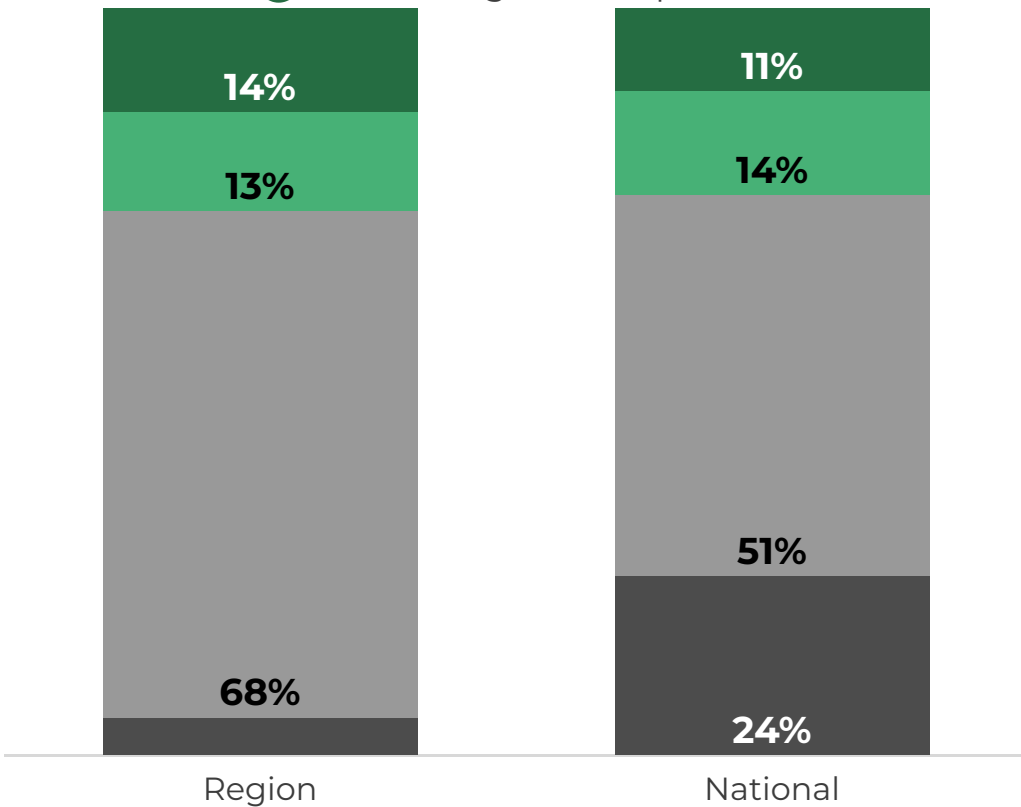

73% of museums in the region are located in an urban area

And 8% of the region's museums are in one of the top 20% most deprived areas in the country

Rural-urban breakdown of museum location compared to the national

- Urban major or minor conurbation
- Urban city and town
- Rural town and fringe
- Rural village and dispersed

Deprivation breakdown of museum location compared to the national

- 20% least deprived
- 20% - 40%
- 40% - 60%
- 60% - 80%
- 20% most deprived

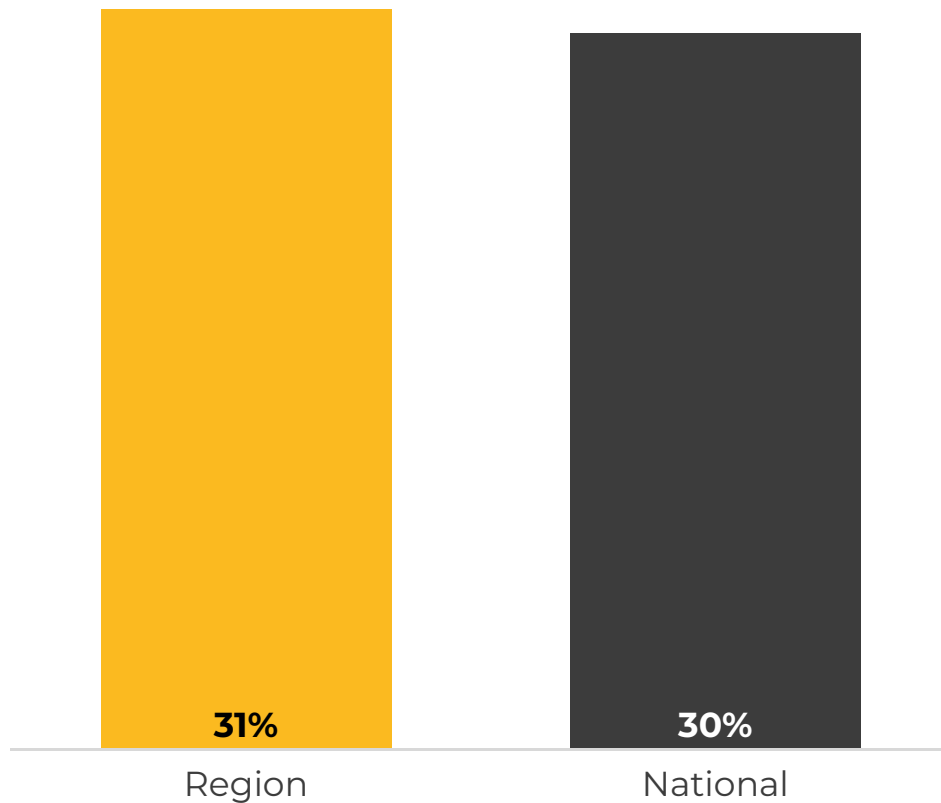

Rural/Urban classifications determined by postcode of museum using ONS classification
Deprivation levels generated from Index of Multiple Deprivation quintiles at an LSOA level

31% of museums in the region are volunteer-run

This is in line with the national breakdown.

Proportion of museums in the region that are volunteer-run compared to the national

61%

Do not collect equality and diversity information about **staff**

Compared to 59% of museums across England

62%

Do not collect equality and diversity information about **volunteers**

Compared to 64% of museums across England

In 2020/21, did you collect the following information about your...? Paid staff (n = 104); regular volunteers (n = 104)

60% of museums in the region would usually be open all year round

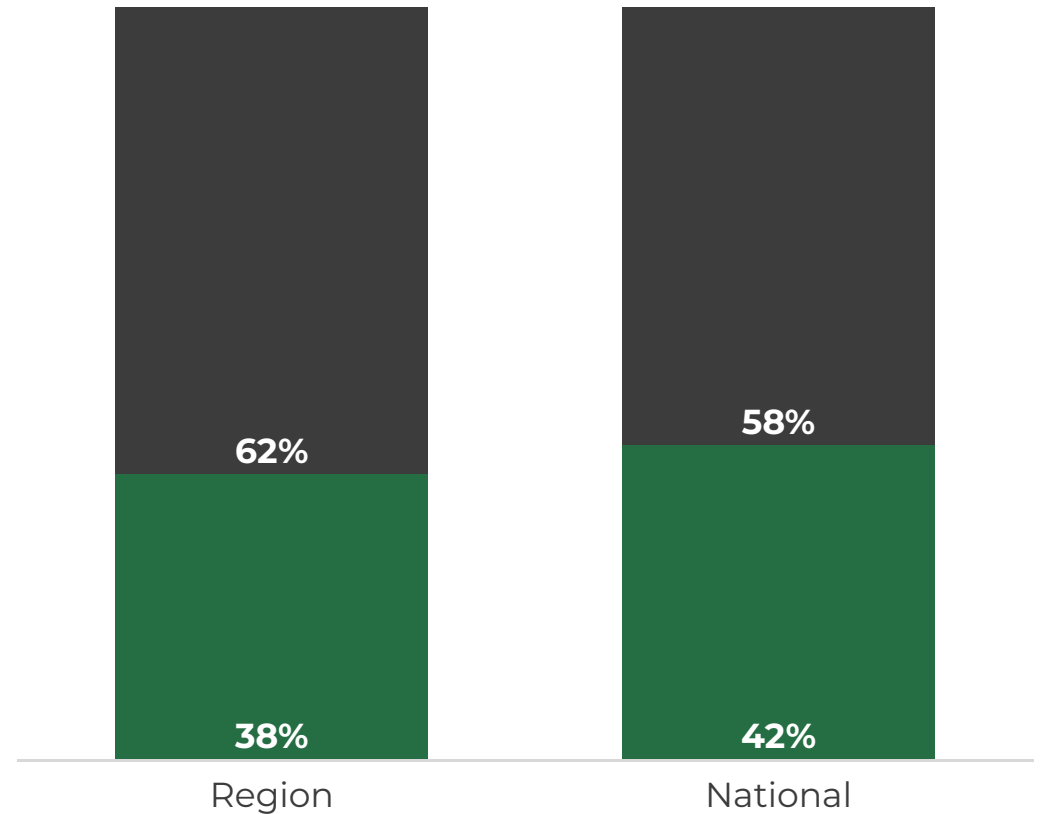

And 38% of museums have outdoor spaces that they can open to the public

Usual opening hours pattern: region compared to national

- Open all year
- Open for part of the year
- Open by appointment only
- Other

Whether or not museums have outdoor spaces: region compared to national

- Have outdoor spaces
- Do not have outdoor spaces

? How would you class your museum's usual opening hours? (n = 142)

Opening during the pandemic

13% of museums in the region did not open at all during 2020/21

The median number of hours open for a museum in the region during the year was 496, compared to 385 nationally; approximately 29% higher in the region

Opening hours during 2020/21: region compared to the national

- Not open
- 1 to 100 hours
- 101 to 500 hours
- Over 500 hours
- No data/unclear

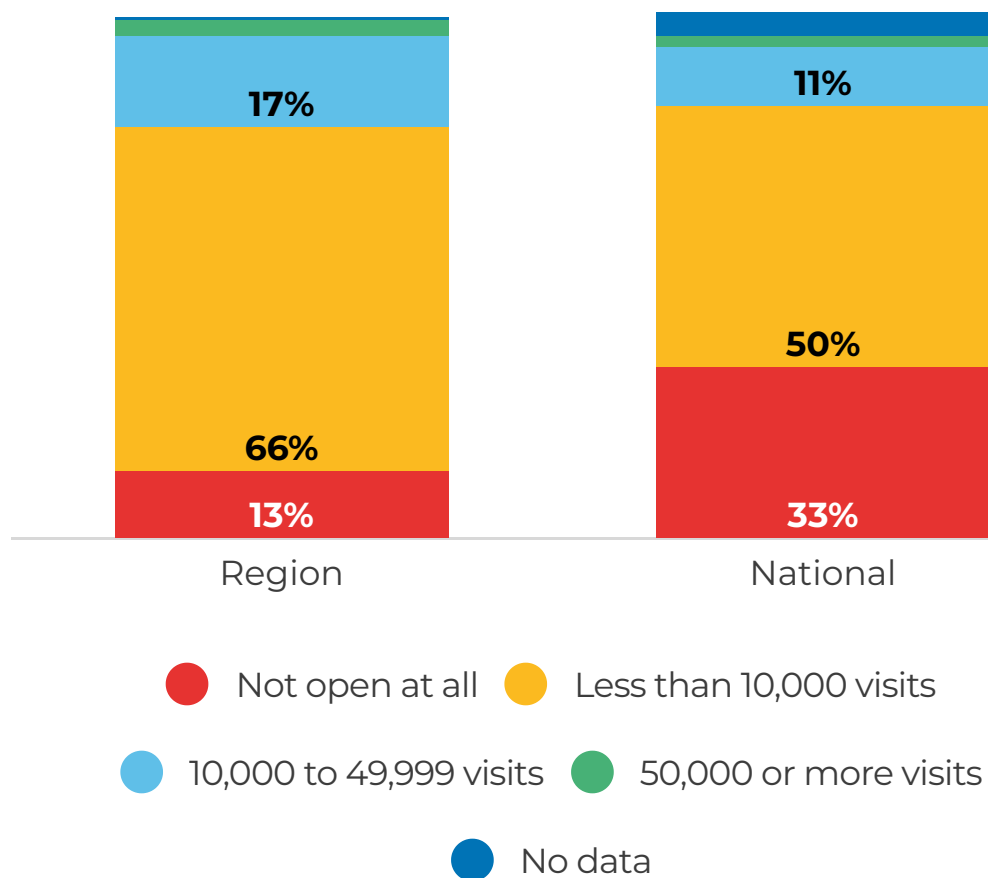

Median change in hours open between 2019/20 and 2020/21: region compared to the national

? How many hours was your museum open to the public in 2020/21? (n = 142)

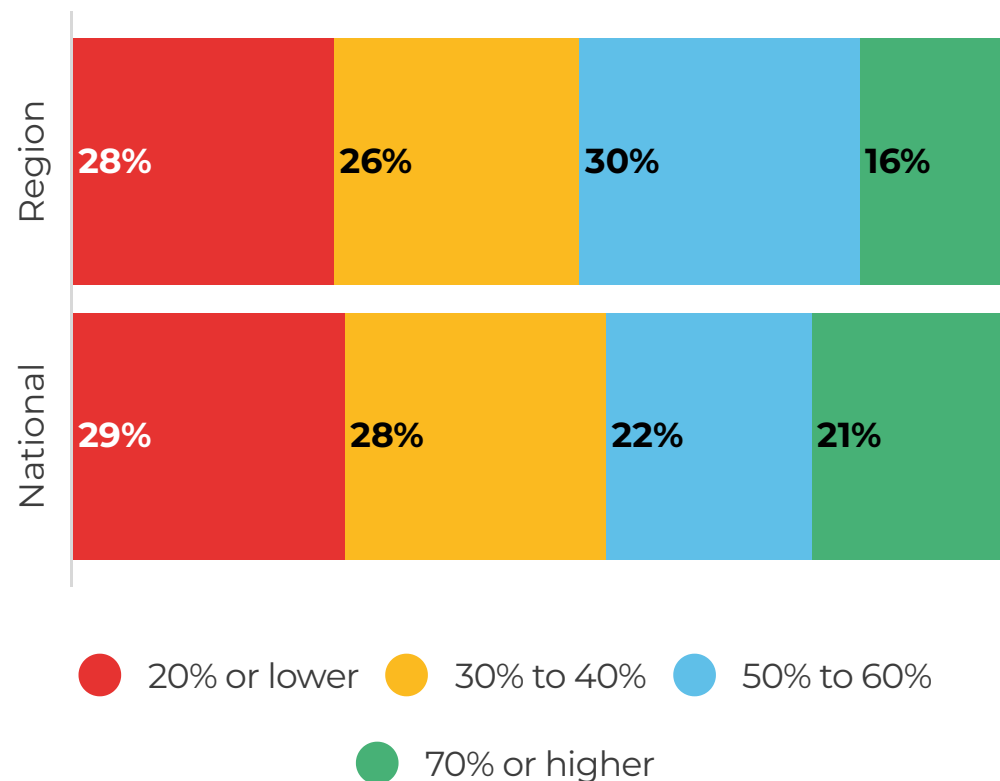

78% of museums in the region were not open or had less than 10,000 visitors during 2020/21

Visitor numbers overview in 2020/21: region compared to the national

28% of museums in the region had an average occupancy below 20% when open

Average occupancy estimated when open in 2020/21: region compared to the national

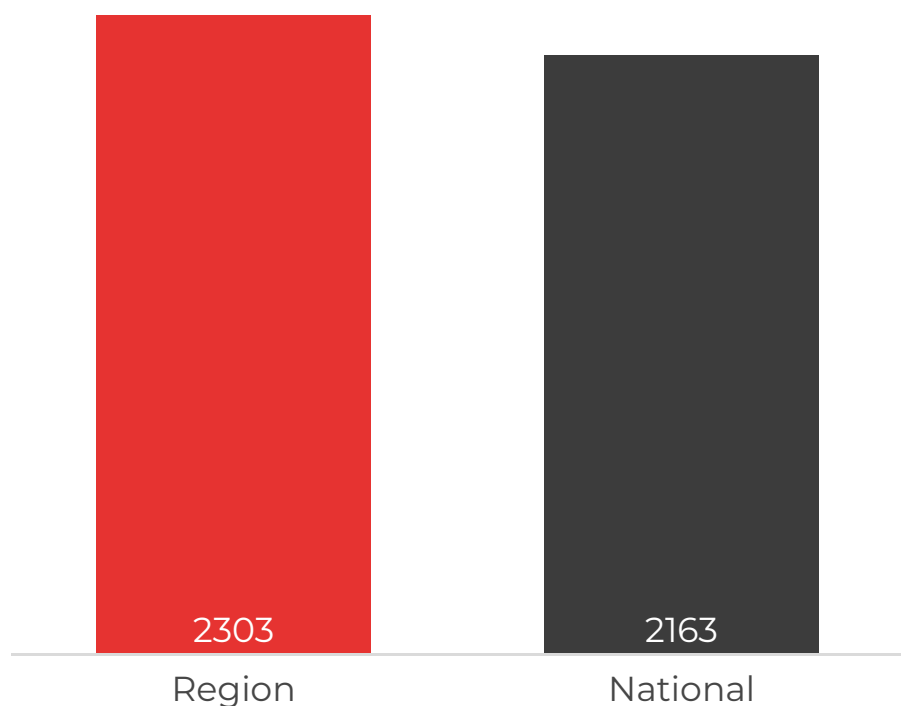

? Combined variable using total opening hours and total visit numbers (n = 142

And visit numbers were down 85% in the region on the previous year

This reduction in visitor numbers for 2020/21 is 88% nationally

Median number of visitors to an accredited museum in 2020/21: region compared to the national

This ranges from 122 (5th percentile) to 41,584 (95th percentile) in the region

The median economic impact of a museum in the region for 2020/21 was £40,452. In 2019/20 this was £355,535.

Economic impact in 2020/21 grouped into bands: region compared to the national

How many adult visitors did your museum have in 2020/21? (Actual and estimate included; n = 117)

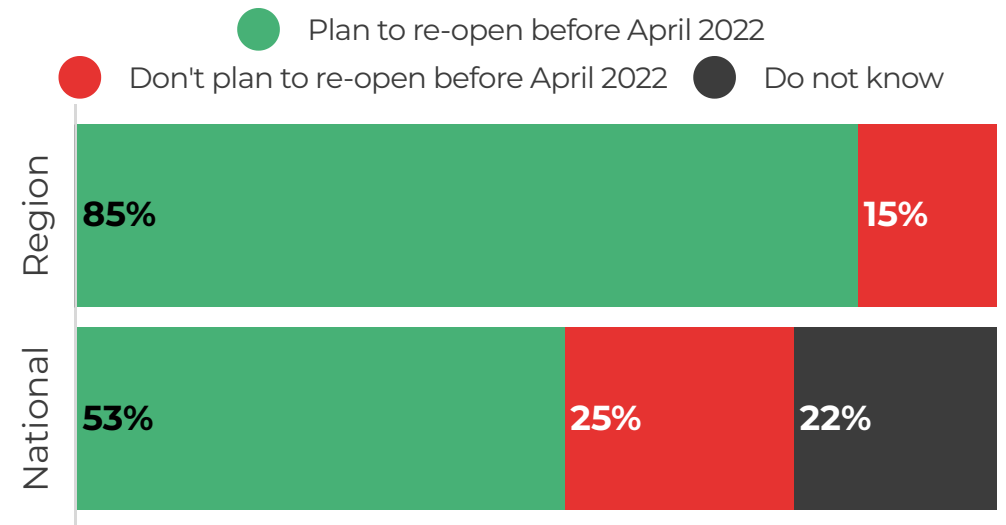

96% of museums in the region had re-opened to the public by Summer/Autumn 2021

At the time of completing the survey, 96% of museums in the region had re-opened to the public after the national Covid-19 restrictions on museums ended on 17 May 2021

Museums that had re-opened to the public since restrictions lifted on 17 May 2021: region compared to the national

Plans for museums that hadn't re-opened at the time of completing the survey: region compared to the national

? Since 17 May 2021, have you re-opened your museum to the public? (n = 116)
Does your museum plan to re-open to the public before 1 April 2022? (n = 5)

Audience engagement and use of digital

Analysis of education sessions and other on-site and off-site activities, and use of digital for engagement
